- "Plug-n-play" B-Smart® pre-calibrated sensors enable simple in-field replacement, reducing instrument down-time and providing low cost of ownership.

Affordable, Easy-To-Use Combustion Analyzer

Based on the same technology as Bacharach's Fyrite® commercial units, the Fyrite® InTech™ is an advanced, American-made, residential combustion analyzer that delivers quick, accurate measurement of oxygen, carbon monoxide, stack temperature and ambient temperature. It helps to reduce service call times by providing accurate, electronic test results instantly via intuitive, push-button operation and a menu of selectable fuel types. A new, high-contrast LCD graphic display, with backlighting, makes your results easy to see in any environment and can be output via an optional wireless printer and reporting kit.

Designed to calculate the efficiency of residential furnaces and combustion appliances by measuring the stack temperature and the percent oxygen level in the flue-gas stream, The Fyrite® InTech™ also features B-Smart® sensor technology which enables simple, in-the-field pre-calibrated sensor replacement, which minimizes instrument downtime and provides a low cost of ownership.

The instrument is light and fits in the palm of your hand, making it easy to handle.

Long Battery Life

Four alkaline batteries typically offer up to 20 hours of continuous operation with an automatic "power off" feature that saves energy

Featuring B-Smart® Sensors

With B-Smart® pre-calibrated CO sensors, contractors can simply replace the instrument's depleted sensor by plugging in a new replacement sensor through an easily accessible port in the back of the unit. The time-saving technology eliminates the need to send in the instrument for calibration or for a new sensor. Your new pre-calibrated sensor will be installed and back on the job in just a few minutes.
